THE COMPLETE CLADDING SOLUTION

A stylish, quality, cost efficient wall and ceiling system that you can rely on.

Our PVC wall and ceiling panelling provides a smooth, decorative, waterproof wall covering for new and existing interior walls in homes, offices and commercial applications. With the benefit of a quick and easy installation process our panels are a low maintenance alternative to other wall coverings including ceramic tiling.

Our decorative wall panels are 100% waterproof and are available in a variety of modern textures and designs. They can help you to quickly and affordably update your bathroom, home or office. Our products use a simple tongue and groove design ensuring installation is incredibly easy and are suitable for fitting over existing tiles. The panels require no grouting, making them very low maintenance and eradicates the potential for build-up of mould, resulting in a hygienic and cleaner finish.

Our panels can be fitted using silicone, screws or staples depending on your wall conditions.

With a range of different sizing options we have a panel to suit your needs.

- ▶ High quality, time and money saving innovations
- ▶ Colour consistency
- ▶ Easy to fit
- ▶ Non-porous & mould free
Suitable for wet & dry areas
- ▶ Class 1 fire rated
- ▶ Range of profiles available

CADCO PVC Wall & Ceiling Panelling

PRODUCT BENEFITS

Care & Maintenance

CADCO Wall and Ceiling panelling is for internal use and is more hygienic and easier to maintain than tiles. The non-porous surface provides excellent protection against bacteria and stains. Use normal cleaning agents i.e. hot soapy water and a soft cloth or sponge. Solvents are not recommended, neither should aggressive cleaning agents be used.

Fixing Options

CADCO Wall & Ceiling Panelling is fixed by adhering the panels to an appropriately sound, flat and plumb sub-surface. If the sub surface is uneven then a timber batten frame system should be installed to give a suitable sub surface to adhere to. The full product installation instructions are supplied with every panel, and are also available via your CADCO supplier.

Please ensure that your fitter is aware of this information prior to installation as no liability can be accepted once panels are fitted.

5 Year Warranty

CADCO Wall & Ceiling Panelling has a 5 year residential/domestic use warranty against manufacturing defects. During the course of manufacture some variation in shade or pattern can occur. Sufficient panels for the area to be covered should be purchased in one consignment to ensure a supply of compatible shades.

Fire Rated

Fire rating tested to BS EN 13501 - 1:2007 achieving an F.R. classification of C,s3,d0.
